SUMMARY

Senior AI Engineer with 2.5 years of experience designing and deploying production-grade Generative AI systems. Hands-on expertise in building multi-agent architectures, RAG pipelines, and agentic workflows using LangChain, Azure OpenAI, and Model Context Protocol (MCP). Experienced in prompt and context engineering to optimize LLM behavior at scale, and in integrating AI capabilities into microservices-based backends. Complementary full-stack background in Python and the MERN stack for end-to-end solution delivery.

WORK EXPERIENCE

Senior AI Developer

HCLTech

November 2025 - Present

- Designed and deployed a production-grade multi-agent AI system for an enterprise client, enabling autonomous task decomposition, delegation, and execution across specialized agents — significantly reducing manual intervention in complex workflows.
- Integrated Model Context Protocol (MCP) as the communication layer between agents and external tools/services, establishing a scalable and maintainable agentic architecture within a microservices ecosystem.
- Engineered end-to-end RAG pipelines — covering ingestion, chunking, embedding, and retrieval — to deliver accurate, document-grounded LLM responses for high-stakes client use cases.
- Applied systematic prompt and context engineering to govern LLM behavior across agents, improving output consistency and reducing hallucinations in production.

Application Development Associate

Accenture

November 2023 - November 2025

- Built a production-ready Generative AI chatbot using Azure OpenAI and LangChain, implementing a full RAG architecture from dataset preparation to cloud deployment on Azure — delivering context-aware, knowledge-grounded conversational AI.
- Designed and developed an IVR-based chatbot on Dialogflow CX to automate customer interaction flows, reducing dependency on live agents for routine queries.
- Owned CI/CD pipeline management and daily deployments, maintaining release reliability and minimizing downtime across environments through automation testing.
- Partnered with design and product teams to translate business requirements into AI-driven features, contributing across the full delivery lifecycle.

SKILLS

Generative AI & Agentic Systems

- Multi-Agent Systems
- Model Context Protocol (MCP)
- Retrieval-Augmented Generation (RAG)
- LangChain
- Azure OpenAI
- Prompt and Context Engineering
- Agentic Workflows

AI Tools & Platforms

- Azure AI Services
- OpenAI API
- GCP

Languages

- Python

Architecture & Methodologies

- Microservices Architecture
- REST APIs
- Agile

CERTIFICATIONS

- Claude Certified Architect – Foundations (CCA-F)
- Microsoft Azure AI Engineer Associate (AI-103)
- OpenAI badges :
 - Codex Deployment
 - API Deployment
 - Foundational

EDUCATION

Master of Computer Applications (MCA)

Chandigarh University | 2021 – 2023 | CGPA: 8.0

Bachelor of Computer Applications (BCA)

Dr. VSICS, Kanpur | 2018 – 2021 | 71.77%
